

Time: Thursday, August 16th & 30th. at 7:15 pm

Location: Dunn Bldg, Dalhousie U., 6310 Coburg Rd

Presenter: Tony Schellinck

Title: "Journey to the Centre of Our Galaxy"

Clear summer nights are the best for a journey of 25,000 light years to the centre of our Galaxy, the Milky Way. Come and learn about our galaxy and the incredible sights we can see along the way to its core. Armed with only a binocular you will be able to re-explore this path at leisure. You will not view the night-sky the same way again!

Admission: \$5 (at the door); reductions for families (minimum age 8 years)

Reservations are required. To reserve seats, e-mail planetarium@dal.ca stating show date, number of adults, and number of children (8–15). The show is about an hour long.

Full details will be sent in advance. **Please do not be late; no admission after the door closes.**

Please note that shows are most suitable for ages 8 and up; for younger children, please ask the [Discovery Centre](#) about age-appropriate shows in their new Immersive Theatre.
